/ PROFESSIONAL SUMMARY

Frontend developer with 5+ years of experience in building responsive web interfaces from scratch – both with and without frameworks. I care about clarity in code as much as I care about clarity in design, and I enjoy creating clean, reusable components that feel natural to use. I'm especially drawn to the challenge of making complex interfaces intuitive across all screen sizes.

/ SKILLS

- **Frontend & Libraries:** HTML5, CSS3, Sass, Tailwind CSS, Bootstrap, JavaScript, Vite, React, Vue 3, Stimulus, Fancybox, noUiSlider, Theme switching, i18n, Responsive Design, Accessibility (a11y), Technical SEO
- **Databases & Backend:** Supabase (PostgreSQL, Auth, Storage), Firebase (Realtime DB, Auth)
- **Hosting & Deployment:** Vercel, Cloudinary, Resend, DNS management (Unlimited.rs)
- **Tools & Platforms:** Git, Docker, WordPress, Wagtail, npm, Figma, ClickUp

/ WORK HISTORY

Frontend Developer | Concentrical | 2023 – 2024 | Remote

- Built fully custom web apps using React, SASS, and Tailwind, focusing on reusable components for long-term scalability.
- Optimized frontend performance by implementing lazy loading, reducing page load time by 30% and improving UX.
- Integrated AI-based content suggestions, enhancing personalization and engagement.
- Delivered consistent, responsive layouts across all devices and screen sizes.

Frontend Developer | Prirodni Rezervat Tara | 2021 – 2023 | Remote

- Developed and launched a WordPress e-commerce site, resulting in a 40% increase in online orders within 3 months.
- Improved mobile UX through simplified navigation and optimized layout.
- Maintained site health with rapid issue resolution and performance monitoring via analytics tools.
- Collaborated with the marketing team to align design with SEO and social media strategy.

Web Editor | IKEA | 2018 – 2019 | Belgrade, Serbia

- Maintained IKEA's website and mobile apps by delivering regular content and structural updates.
- Developed frontend features using HTML, CSS, and JavaScript, aligned with brand guidelines.
- Ensured localization support and visual consistency across multiple markets.

/ PROJECTS

- Neon Digital - Built a fully responsive marketing website using HTML, CSS, Tailwind CSS, and Vite. Focused on UI/UX, creating clean layouts, smooth animations, and performance-optimized structure.
  GitHub: github.com/andric-dusica/neon_digital

- Chainlit Chat Application - Developed a custom chat interface using React and implemented language switcher with i18next. Integrated dark/light theme toggle and added features such as editable messages and streaming responses.
  GitHub: github.com/andric-dusica/chainlit-project

- React Application Similar to ChatDoc - Built a full-featured frontend using React, with modals, PDF viewer, upload features, and styled notepad. Enabled export in PDF/DOCX, and added chat interface with persona-based prompts. Emphasis on reusable components to ensure scalability and maintainable code structure. (Internal project – not publicly available)

- My Liaison - Developed the complete frontend from scratch, including dynamic user profiles and advanced search filters for U.S. colleges. Ensured seamless user experience and responsive design across devices.
